

AMENDMENTS TO THE SPECIFICATION

IN THE SPECIFICATION:

Please add the following new text on page 4, after line 19 and before line 20.

--Hybridomas which secrete anti-human medullasin monoclonal antibodies designated as 3F03 and 2E04 have been deposited on the 30th day of January, 2004 at the International Patent Organism Depository, National Institute of Advanced Industrial Science and Technology, which is located at Tsukuba Central 6, 1-1, Higashi 1-chome, Tsukuba-shi, Ibaraki-ken, Japan. The deposits were assigned accession numbers FERM BP-08606(3F03) and FERM BP-08605(2E04). The above depository will be permanent and readily accessible thereto by the public if a patent is granted, under conditions which assure (a) that access to the culture will be available during pendency of said patent application to one determined by the Commissioner to be entitled thereto under 37 C.F.R. 1.14 and 35 U.S.C. 122, and (b) that all restrictions on the availability to the public of the above-mentioned culture will be irrevocably removed upon the granting of a patent. In the event that any of the strains should become non-viable, mutate or inadvertently destroyed, the deposit will be replaced at the above-mentioned depository. The above-mentioned deposit will be maintained (1) for thirty (30) years from the date of deposit, (2) for five (5) years after the last request for the deposit at the depository which is made during the enforceable life of any patent which will issue from the above-identified application or (3) for the enforceable life of any patent which issues from the present application, whichever is longer.--
